LONDON NOT ACTIVE-LOCAL STOCKS FIRM.

MONEY IN THE OPEN DIS

COUNT MARKET HARDER. Activity in Trading Confined to a

Few Special Stocks-Southern Pacific Firm on Buying.

REPUBLIC SPECIALA New York Oct 31-The London market REPUBLIC SPECIAL was not active, but American stocks were

generally firm and closed so. Consols were here to-day as follows: practically unchanged on the day, and in view of the closing of the London Stock Exchange Thursday, there was little doing in the general market. The tendency of money in the open discount market was slightly harder, but no change in the bank ate was expected. Berlin exchange on London was firmer. There was no feature of interest in the political situation, and the tendency generally was to await developments. Bar silver was steady, and there was every reason to expect that the lerge Indian demand would be maintained. In the local market the volume of trading had materially fallen off, and activity was confined to a few special stocks. Southern Pacific was firm on buying of a similar character to that of the last few days. Northern Pacific sold off on sales for London account. Traders hid up Sogar to catch a prominent short interest, insiders were reported to be bullish on the traction stocks, but there was little outside interest in them. Perhaps the best feature of th market was the strength shown in Pennsylvania and the granger stocks, on what was considered, with some show of reason, to be good investment buying. The Steel stocks were rather neglected, and a little inclined to sag. The general tone was dull, but hard, and it looked as if the better

but hard, and it looked as if the bester class of commission-houses were content to discourage outside speculation, pending the election.

The sag of the early afternoon continued up to the close and prices generally were lower on the day. The most of the trailing seemed to be evening up of accounts over the election. There was a hard undertone, however, and the general helief was that the large interests were inclined to let the market drift in its own course. Money continued comparatively easy.

The declaration of the regular dividend of the period of the regular dividend of the period of the period of the regular dividend of the period of the regular dividend of the period of the regular dividend of the period of the period of the regular dividend of the period of the period disturber of rates, and inflict much harm on the Gould and Transcontinental systems. It may be taken as one of the most probable developments of the future that it will be worked on friendly and advantageous terms with the Gould, Union Pacific and Chicago and Alton systems.

Ordinance No. 20671, for reconstructing Chouteau avenue from Compton avenue running south of Chouteau avenue to Grazd avenue, was approved April 12, 1960. Under this ordinance, letting No. 6572 was held June 25, 1969, and contract No. 5795 awarded to the lowest bidder, G. H. Wright Contracting Company, July 9, 1860. What has been said in regard to contract No. 5755

has equal force for this contract. The work of reconstructing the railroad tracks was completed on September 4, 1896. On the same day notice was sent to contractor to commence work within one week and finish the work on or before October 25. The troiley poles were removed on this section with the same disjusted as those on the other section, but the old wooden poles, etc., still obstruct the line of the new cumbing. The work was postponed by this department owing to the lateness of the vasion, relieving the contractor of liability in regard to the time limit.

Very respectfully.
